STUDENT TRANSFER REPORT

2013-14

This report provides information about student transfers within Arlington in school year 2013-14. A transfer student is a student who attends a school but does not reside within that school's boundaries or one who attends a school that does not have an attendance area, that is, it is not a neighborhood school. The report informs the capacity monitoring and planning process. Factors which affect the number of transfers allowed are the previous September 30 membership and projected enrollment.

CONTENT OF REPORT

All data included in this year's report reflect enrollment as of June 12, 2014. Only students in kindergarten through grade 12 are reported. It includes all students at countywide and area schools and out-of-county students attending through the staff tuition initiative.

The first table is a division summary at the school level of students who have transferred by sending school. For each school, it displays the total enrollment, the total number of students who transferred into that school, and the percentage of enrolled students who are transfers. It also provides a breakdown of the transfers by sending school.

Sending school, the school from which the student transferred, is usually the student's home school based on the address in the student information system. Under No Child Left Behind (NCLB), students who are scheduled to attend Title I schools that did not make Adequate Yearly Progress (AYP) for 2 consecutive years can transfer to another designated school. The school that does not meet AYP qualifies the student to transfer, and that school may not be the student's home school. In this case, the school from which the NCLB transfer was taken is reported here as the sending school.

The second table is a division summary at the school level of students who have transferred by transfer type. For each school, it displays the total enrollment, the total number of students who transferred into that school, and the percentage of enrolled students who are transfers. It also provides a breakdown of the transfers by transfer type. Transfer types are defined on page 42.

A one page, school level summary for each school is included in this report. The school summaries are presented in order of level: elementary, middle, and high.

Each school summary shows the distribution of students by three demographic characteristics: Grade, Race/Ethnicity, and Economic Status. There is a separate table for each characteristic of students who have transferred by transfer type. For each characteristic, the following are provided:

- Total enrollment
- Total number of students who transferred into that school
- The percentage of enrolled students who are transfers
- The breakdown of the transfers by transfer type.

Transfer policy is described fully in APS Policy 25-2.2 Enrollment and Transfers for Schools and Programs and is available on the APS website at
